PROFESSIONAL EXPERIENCE

Bluon Tech

Feb 2025 - Aug 2025

Jr. Software Developer

Kovilpatti, Tamil Nadu

- Built the Udhaya App backend (real estate, motors, loans), designing normalized MySQL schemas and 10+ RESTful APIs for listings, loan applications and advertisements.
- Implemented JWT authentication, OTP verification and transactional email flows, strengthening account security across the application.
- Built Laravel Blade admin panels for users, listings, loans and ads, and improved backend reliability on the E-Vahan Sevai application.
- Delivered 5+ responsive, cross-browser websites in HTML5, CSS3, Bootstrap and JavaScript, including the official DMDK party website.

PROJECTS

AI Resume Analyzer | Spring Boot, Core Java, Gemini AI API, MySQL, JWT

- Built an ATS-style resume analyzer in Spring Boot and Core Java that extracts PDF content and returns a score, strengths, weaknesses and improvement tips through the Gemini AI API.
- Secured accounts with JWT and Spring Security, and designed an optimized MySQL schema backing resume history and dashboard analytics.
- Developed REST APIs for upload, analysis and report management, validated with Postman and documented the system architecture.

Smart Expense Splitter - Group Expense Manager | Next.js, Node.js, Express, MongoDB, JWT

- Architected a full-stack group-expense app in Next.js with Express REST APIs and a real-time settlement engine that resolves who owes whom across a group.
- Implemented full expense CRUD with search, filter and sort over scalable Mongoose schemas and aggregation queries, with JWT and bcrypt authentication.

CookLease - Rental Management Platform | React, Node.js, MongoDB, Google OAuth 2.0, Recharts

- Built a MERN rental platform with REST APIs for users, listings, orders and returns, secured by multi-layer authentication using JWT, Google OAuth 2.0 and bcrypt.
- Built a real-time admin dashboard in React and Recharts covering order analytics, payment tracking and revenue visualization.
